DETAILED ACTION

Allowable Subject Matter

1. Claims 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: The claimed method to thermally bond a lubricant to a disk as set forth in claims 1 and 25 that repeatedly writes data back to the disk a plurality of times to generate heat for thermally bonding the lubricant to the magnetic disk is neither taught by nor an obvious variation of the art of record. Claim 9 sets forth a computer program product and claim 17 sets forth a disk drive, each of which contains language similar as discussed above with respect to claims 1 and 25 and are therefor allowed for similar reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patel et al. is a general teaching of using a lubricant on a magnetic disk. Wei et al. teaches to bond a lubricant to a disk using thermal, chemical, polar, ultra-violet bonding techniques.
